DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group 1 in Paper No. 4 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claims 1-5 and 8-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Bartle, et al** in view of **Cashman**.

Bartle, et al disclose all subject matter, note the abstract, etc., except for recognizing a service option from a received paging message. **Cashman** teaches the use of recognizing a service option from a received paging message (note abstract, etc.) for the purpose of determining and changing the mode of communication of the cellular terminal. Hence, it would have obvious to one of ordinary skill in the art at the time the claimed invention was made to incorporate the use of recognizing a service option from a received paging message, as taught by **Cashman** in the cellular terminal of **Bartle, et al** for the purpose of determining and changing the mode of communication of the cellular terminal in order to change the communication mode, like to a CDPD mode.

Reagrding claims 5, it's well known in the art that a telephone, cellular or not, can store unique alert tones or displays for different services or functions and the Examiner takes official notice as such and hence, it would have bee very obvious to one of even below ordinary skill in the art at the time the claimed invention was made to incorporate the use of unique alert tones or displays for different services or functions in the cellular terminal of **Cashman** in the cellular terminal of **Bartle, et al** in order for the user to recognized a change of service or function of the cellular terminal.

Allowable Subject Matter

6. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

7. Claims 6 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to WILLIAM D. CUMMING whose telephone number is 703-305-4394. The examiner can normally be reached on Monday through Thursday, 9:30 to 5:30, EDT.
